International Journal of Mass Spectrometry and Ion Processes

Subject Index

Biomolecules
A new method of laser desorption mass spectrometry for the study of biological macromolecules 135

C_{60}
Gas-phase fast-atom bombardment mass spectrometry 1
Carbon clusters
MeV atomic ion sputtering of fullerenes: a radial velocity distribution study 193
Cerium
Flame-ion chemistry of the lanthanide metals Ce, Pr and Nd 43
Cesium bombardment
The influence of the surface binding energy on the emission of MCs^+ secondary ions from elemental targets in secondary ion mass spectrometry 209
Charge exchange ionization
Gas-phase fast-atom bombardment mass spectrometry 1
1-Chloronaphthalene radical cation
Ion/molecule reactions of naphthalene and 1-chloronaphthalene radical cations 157
Collisional activation
Generation and characterization of ionic and neutral thiocarbonylisothiocyanate $[SCNCS]^{+/\cdot}$ by neutralization–ionization mass spectrometry L1
Collision-induced dissociation
A new experimental approach to investigate the kinetics of low energy electron attachment reactions 225
Cyclotron
Ion transport through a strong magnetic field gradient by r.f.-only octupole ion guides 121

Depth profiling
Secondary ion mass spectrometry studies on the formation of the valve metal oxide in ruthenium- and iridium-based mixed oxide electrodes 87

Dichlorotoluene isotopomers
Determination of isotope shifts in 2,4-, 3,4- and 2,6-dichlorotoluene isomers in a supersonic beam 79
Double-electron capture
Spin violation in double-electron capture by Ar^{4+} ions 21

Electrocatalysis
Secondary ion mass spectrometry studies on the formation of the valve metal oxide in ruthenium- and iridium-based mixed oxide electrodes 87
Electron attachment
A new experimental approach to investigate the kinetics of low energy electron attachment reactions 225
Electron impact
Electron impact mass spectrometry of indole derivatives 97
Electronic sputtering
MeV atomic ion sputtering of fullerenes: a radial velocity distribution study 193
Energy distributions
The influence of the surface binding energy on the emission of MCs^+ secondary ions from elemental targets in secondary ion mass spectrometry 209
Experimental
Field ion spectroscopy of oscillating surface reactions: H_2/O_2 and H_2/H_2O on platinum 185
External ion source
Ion transport through a strong magnetic field gradient by r.f.-only octupole ion guides 121

Fast heavy ion bombardment
Fast heavy ion induced photon emission from organic solids and plasma desorption mass spectrometry 31
Field ion mass and appearance energy spectroscopy
Field ion spectroscopy of oscillating surface reactions: H_2/O_2 and H_2/H_2O on platinum 185

Flames
Flame-ion chemistry of the lanthanide metals Ce, Pr and Nd 43
Fourier transform
Ion transport through a strong magnetic field gradient by r.f.-only octupole ion guides 121
FT-ICR
Ion transport through a strong magnetic field gradient by r.f.-only octupole ion guides 121
FTMS
Ion transport through a strong magnetic field gradient by r.f.-only octupole ion guides 121
Fullerenes
MeV atomic ion sputtering of fullerenes: a radial velocity distribution study 193

Gas-phase fast-atom bombardment
Gas-phase fast-atom bombardment mass spectrometry 1
Germane
Gas phase ion/molecule reactions in phosphine/germane mixtures studied by ion trapping 61

Hetero cumulenes
Generation and characterization of ionic and neutral thiocarbonylisothiocyanate $[SCNCS]^{+/\cdot}$ by neutralization–reionization mass spectrometry L1
Hydrogen-bridged radical cations
Double hydrogen atom transfer in lactamide radical cations via ion–neutral complexes 217

ICR
Ion transport through a strong magnetic field gradient by r.f.-only octupole ion guides 121
Indole derivatives
Electron impact mass spectrometry of indole derivatives 97
Injection
Ion transport through a strong magnetic field gradient by r.f.-only octupole ion guides 121
Ion chemistry
Flame-ion chemistry of the lanthanide metals Ce, Pr and Nd 43
Ion formation mechanism
Gas-phase fast-atom bombardment mass spectrometry 1
Ion mirror
Analytic expression for the ideal one-dimensional mirror potential yielding perfect energy focusing in TOF mass spectrometry 177
Ion mobility mass spectrometer
A new experimental approach to investigate the kinetics of low energy electron attachment reactions 225
Ion tracks
MeV atomic ion sputtering of fullerenes: a radial velocity distribution study 193
Ion trap
Ion storage combined with reflectron time-of-flight mass spectrometry: ion cloud motions as a result of jet-cooled molecules 111
Ion trap mass spectrometry
Gas phase ion/molecule reactions in phosphine/germane mixtures studied by ion trapping 61
Ion/molecule reactions
Ion/molecule reactions of naphthalene and 1-chloronaphthalene radical cations 157
Ion–neutral complexes
Double hydrogen atom transfer in lactamide radical cations via ion–neutral complexes 217
Isotope dilution mass spectrometry
An IRMM ^{87}Rb isotopic reference material IRMM-618 69

Jet-cooled molecules
Ion storage combined with reflectron time-of-flight mass spectrometry: ion cloud motions as a result of jet-cooled molecules 111

Kinetics
Gas phase ion/molecule reactions in phosphine/germane mixtures studied by ion trapping 61

Laser desorption
A new method of laser desorption mass spectrometry for the study of biological macromolecules 135
Liquid beam
A new method of laser desorption mass spectrometry for the study of biological macromolecules 135

Magnetic mirror
Ion transport through a strong magnetic field gradient by r.f.-only octupole ion guides 121
Mass spectrometry
A new method of laser desorption mass spectrometry for the study of biological macromolecules 135
Membrane inlet mass spectrometry
Time- and concentration-dependent relative peak intensities observed in electron impact membrane inlet mass spectra 143

Metal cesium secondary ion formation
The influence of the surface binding energy on the emission of MCs^+ secondary ions from elemental targets in secondary ion mass spectrometry 209
Mixed oxide coatings
Secondary ion mass spectrometry studies on the formation of the valve metal oxide in ruthenium- and iridium-based mixed oxide electrodes 87
Multipole
Ion transport through a strong magnetic field gradient by r.f.-only octupole ion guides 121

Naphthalene radical cation
Ion/molecule reactions of naphthalene and 1-chloronaphthalene radical cations 157
Negative ions
Gas-phase fast-atom bombardment mass spectrometry 1
Neodymium
Flame-ion chemistry of the lanthanide metals Ce, Pr and Nd 43
Neutralization–reionization
Generation and characterization of ionic and neutral thiocarbonylisothiocyanate $[SCNCS]^{+/\cdot}$ by neutralization–reionization mass spectroscopy L1

Octupole
Ion transport through a strong magnetic field gradient by r.f.-only octupole ion guides 121
Organic compounds
Gas-phase fast-atom bombardment mass spectrometry 1

Partial pressure transients
Time- and concentration-dependent relative peak intensities observed in electron impact membrane inlet mass spectra 143
Phosphine
Gas phase ion/molecule reactions in phosphine/germane mixtures studied by ion trapping 61
Photon emission
Fast heavy ion induced photon emission from organic solids and plasma desorption mass spectrometry 31
Plasma desorption
Fast heavy ion induced photon emission from organic solids and plasma desorption mass spectrometry 31
Positive ions
Gas-phase fast-atom bombardment mass spectrometry 1
Praseodymium
Flame-ion chemistry of the lanthanide metals Ce, Pr and Nd 43

Proportional counter
Determination of isotope shifts in 2,4-, 3,4- and 2,6-dichlorotoluene isomers in a supersonic beam 79

^{87}Rb
An IRMM ^{87}Rb isotopic reference material IRMM-618 69
Reaction mechanisms
Double hydrogen atom transfer in lactamide radical cations via ion–neutral complexes 217
Gas phase ion/molecule reactions in phosphine/germane mixtures studied by ion trapping 61
Reference material
An IRMM ^{87}Rb isotopic reference material IRMM-618 69
Reflectron
Analytic expression for the ideal one-dimensional mirror potential yielding perfect energy focusing in TOF mass spectrometry 177
Reflectron time of flight
Ion storage combined with reflectron time-of-flight mass spectrometry: ion cloud motions as a result of jet-cooled molecules 111
Relative peak intensity
Time- and concentration-dependent relative peak intensities observed in electron impact membrane inlet mass spectra 143
Resolution
Analytic expression for non-linear ion extraction fields which yield ideal spatial focusing in time-of-flight mass spectrometry 169
Analytic expression for the ideal one-dimensional mirror potential yielding perfect energy focusing in TOF mass spectrometry 177
Resonance-enhanced multiphoton ionization
Determination of isotope shifts in 2,4-, 3,4- and 2,6-dichlorotoluene isomers in a supersonic beam 79

Secondary ion mass spectrometry
Secondary ion mass spectrometry studies on the formation of the valve metal oxide in ruthenium- and iridium-based mixed oxide electrodes 87
The influence of the surface binding energy on the emission of MCs^+ secondary ions from elemental targets in secondary ion mass spectrometry 209
Selected ion flow tube
Ion/molecule reactions of naphthalene and 1-chloronaphthalene radical cations 157
Spatial and time correlated emission
The influence of the surface binding energy on the emission of MCs^+ secondary ions from elemental targets in secondary ion mass spectrometry 209

Spin violation
Spin violation in double-electron capture by Ar^{4+} ions 21
Supersonic beam
Determination of isotope shifts in 2,4-, 3,4- and 2,6-dichlorotoluene isomers in a supersonic beam 79
Supersonic molecular beam
A new experimental approach to investigate the kinetics of low energy electron attachment reactions 225
Surface-induced dissociation
Time- and concentration-dependent relative peak intensities observed in electron impact membrane inlet mass spectra 143
Surface reactions
Field ion spectroscopy of oscillating surface reactions: H_2/O_2 and H_2/H_2O on platinum 185

Tandem mass spectrometry
Double hydrogen atom transfer in lactamide radical cations via ion–neutral complexes 217
Time of flight
Determination of isotope shifts in 2,4-, 3,4- and 2,6-dichlorotoluene isomers in a supersonic beam 79
Time-of-flight design
Analytic expression for non-linear ion extraction fields which yield ideal spatial focusing in time-of-flight mass spectrometry 169
Analytic expression for the ideal one-dimensional mirror potential yielding perfect energy focusing in TOF mass spectrometry 177
Titanium dioxide
Secondary ion mass spectrometry studies on the formation of the valve metal oxide in ruthenium- and iridium-based mixed oxide electrodes 87
Translational energy spectroscopy
Spin violation in double-electron capture by Ar^{4+} ions 21
Two-electron capture by C^{3+} ions: competition between single and double electron processes 201
Two-electron capture
Two-electron capture by C^{3+} ions: competition between single and double electron processes 201
